

PHIFER **BETTERVUE**®

The Next Generation in Pool & Patio Screening

Why BetterVue ...

- Insect Protection**
33% increase over standard 18x14
- Airflow**
Improves airflow by 7%
- Light Transmittance**
9% greater for a warmer pool

BetterVue Screen ...

- Strong and durable
- Built to withstand harsh coastal environments
- ... and don't forget about the BetterVue!*

BetterVue is Phifer's first fiberglass improved visibility insect screen (iVis). Engineered to provide a sharp view without sacrificing strength and durability in the process. Maximizes the view by making it sharper and more brilliant.

BetterVue Insect Screen

Improved Visibility without Sacrificing Strength

Q: Is BetterVue as strong as standard 18x14 screen ...

A: BetterVue has 40 yarns per square inch compared to 32 yarns in standard 18x14 screen.

A: BetterVue passed the 110 mph wind tunnel testing. Florida Building Code, high-velocity hurricane test standard 100-95.

Q: Will BetterVue last as long as standard 18x14 screen and is it as durable as standard 18x14 ...

A: BetterVue is QUV tested to 1200 hours and Xenon Arc tested to 2500 kjs.

Both BetterVue and standard 18x14 have the same coating.

A: BetterVue performs equally to 18x14 in these weathering tests even though it uses finer yarns.

While BetterVue is engineered to be visually undetectable from the center of a living room, it can be seen from a few feet away. This feature eliminates the risk of accidentally walking into the screen and makes BetterVue the perfect choice for all patios, screen rooms and pool enclosures.

*** SPECIAL NOTE:** All these features and benefits at the SAME PRICE as standard 18x14! BetterVue is clearly the visual choice for any home application over standard 18x14 screening.
