

Industrial Metals

Introduction

T&C Metals has been serving the diverse needs of the aluminum industry since 1992. We have developed inventory and distribution systems which insure timely delivery of materials to a great many industries.

We provide users of industrial aluminum products with standard shapes of angles, bar, pipe, tubes and custom shapes made to your specifications. T&C Metals also has coil processing equipment in Tampa which enables us to cut sheets to standard and specific lengths resulting in cost savings to our customers.

This catalog is a guide to the materials currently stocked in our industrial system.

With multiple locations in the Southeastern United States, our customers have come to rely on T&C Metals associates, inventory and delivery systems. They know T&C Metals will be there with the products and service they require.

Try us. We are ready to serve your varied needs. Your T&C Metals Representative is available to answer any questions involving current inventory and any special order needs you may have.

Call on us for your next aluminum requirements. See for yourself how T&C Metal's experience, inventory and service can benefit you and your company. We thank you for the opportunity to provide our services to you.
