**Town & Country**  
INDUSTRIES  
Wholesale Aluminum and Building Products

**When it comes to protecting what matters most - your family, home, and business - trust Town & Country Industries. We offer a full line of reliable Eyewall Armor® shutters for year-round protection against extreme weather.**

Our Eyewall Armor™ products have undergone extensive research, development, and testing to ensure that they are the strongest and most durable hurricane products available. We offer Eyewall Armor™ 6.8, SL, and HR Accordion Shutters, which are suitable for meeting various testing requirements, including Florida Building Code HVHZ/non-HVHZ and IBC/IRC ASTM Standard requirements, known as the most stringent in the nation. The HR Accordion is the only accordion tested to the extreme "Essential Facilities" ASTM test, which raises the 2 x 4 missile test from 50 to 80 fps, a level that can demolish block construction. Our products carry approvals for all regions under the Florida Building Code HVHZ/non-HVHZ, as well as evaluations by the Texas Department of Insurance.

Eyewall Armor™ Accordion Shutters have been designed to address a common issue with other accordion shutters on the market: corrosion. Unlike other shutters, Eyewall Armor™ features a patented offset screw boss that allows for easy lubrication of the assembly screws, preventing corrosion and ensuring continuous and reliable operation.

These shutters not only maintain like-new performance for years after deployment, but they also offer the simplest and fastest one-step locking procedure in the industry. No additional locking rods or devices are required. Additionally, they are the tightest-stacking shutters available today and are virtually undetectable in your home. When protection is paramount, Eyewall Armor™ Accordion Shutters provide uncompromising performance.

If you need extra protection for businesses or high-rise structures, the Eyewall Armor™ High-Rise Accordion System is designed for you. This system shares the same features as our standard 6.8/SL Accordion System but is specifically engineered for high-rise, high-performance structures that require much higher wind loads. The H.R. System can span up to 15'6" in height and has been tested to pressures beyond 300 psf, which translates to wind speeds well in excess of 300 mph.

The Streamline (SL) Accordion is a cost-effective residential system option. Despite being lighter and more affordable than our 6.8 system, the SL offers the same features and benefits. It meets the same testing and code requirements and carries the same approvals as the 6.8 system.

#### **FEATURES INCLUDE:**

- Offset Screw boss.
- The only hinge that can be lubricated.
- Unparalleled hurricane protection.
- Added property value.
- Corrosion-resistance.
- Long term durability.
- Easy maintenance and care.
- Long-lasting performance.
- Less obtrusive than any other accordion system.
- Designed to cover almost any type of opening.
- Fast and simple one-step locking.
- No additional locking rods required.
- Available in a choice of designer colors: White, Bronze, Ivory and Beige.
- Professional in-house customer service and technical support.
