## 410 Stainless Steel Screws Self Drill, Sheet Metal & Concrete Screws with T&C-Ultracote™

Town & Country has rigorously tested nearly every commercially available coating under accelerated laboratory conditions. Time and again, coatings that claimed to last thousands of hours failed in mere hundreds. No coating lived up to its manufacturer's claims. Until now.

### Unmatched Performance with T&C-Ultracote™

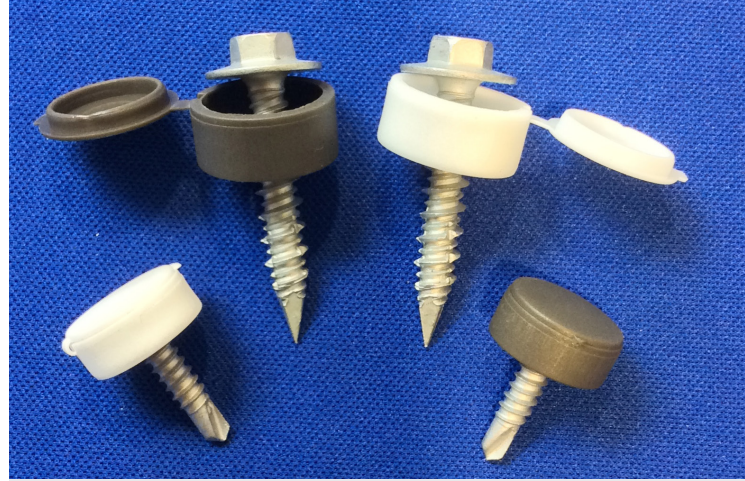

- **Ultimate Anchors & Connectors for Aluminum Structures:** T&C-Ultracote™ combined with 410 Stainless Steel screws delivers the strongest and most durable fastening solution for aluminum structures.
- **Superior Corrosion Resistance & Longevity:** Specifically designed for shutters and aluminum structures, offering the highest level of corrosion protection available.
- **Stronger than 300 Series Stainless Steel:** 410 Stainless Steel provides superior strength compared to 300 series stainless steel and, when combined with T&C-Ultracote™, delivers unmatched protection against dissimilar metals and galvanic corrosion.
- **Meets Engineering Standards:** 410 SS complies with all engineering requirements where 300 stainless steel falls short, ensuring superior performance over both standard carbon steel and 300 stainless steel.
- **Real-Life Testing:** Unlike competitors, T&C-Ultracote™ coatings are tested in real-world conditions while mounted into aluminum, ensuring reliable and proven results.
- **Outperforms Every Other Coating:** T&C-Ultracote™ surpasses all other coatings tested in real-life conditions.

### It's the Coating that Makes the Difference.

Upgrade to 410 Stainless Steel Screws with T&C-Ultracote™ for the ultimate in strength, corrosion resistance, and longevity!

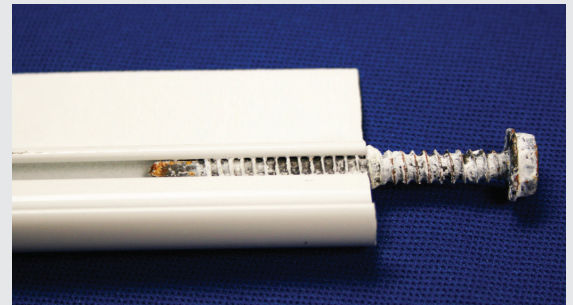

*The combination of T&C-Ultracote™ and 410 SS screws provides superior anchoring and connectivity for aluminum structures.*

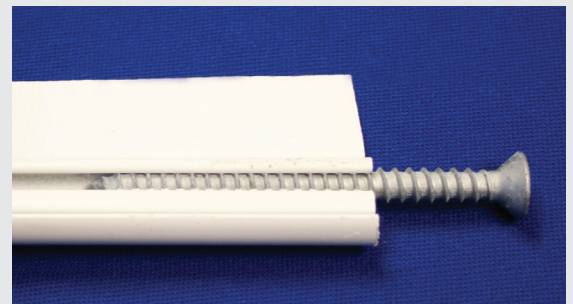

*Screw cap covers shield screws from the elements and conceal unsightly screw heads, available in White, Beige, Ivory, and Bronze.*

### KEY FEATURES:

- Made from 410 Stainless Steel for superior strength
- T&C-Ultracote™ for maximum corrosion resistance
- Designed for self-drilling, sheet metal, and concrete applications
- Ideal for aluminum structures, shutters, and high-corrosion environments
- Exceeds industry standards for performance and longevity
- Available with decorative screw cap covers for added protection

*In accelerated laboratory settings, other tested coatings look like this.*

*A 410 SS concrete screw with T&C-Ultracote™ after installation in concrete and threading into aluminum.*
